Summary

Aspiring software engineer with foundational knowledge of Python, Java, JavaScript, HTML, CSS, and SQL. Familiar with object-oriented programming and Git/GitHub for version control. Interested in software development, computer vision, and building practical technology solutions.

Technical Skills

Programming Languages: Python, Java, JavaScript
Web Technologies: HTML, CSS
Cloud: Google Cloud Platform (GCP)
Databases: SQL
Developer Tools: Git, GitHub , VS Code
Core Concepts: DSA, Programming fundamentals, OOPS, Computer Networks(CN), Operating Systems(OS), DBMS

Internship

MindMatrix.io **Feb 2026 – May 2026**
Android App Development using Generative AI Intern

- Worked on Android application development using Kotlin and Jetpack Compose, following standard Android development workflows.
- Gained hands-on experience with Android Studio, Google Cloud Labs, and Google AI Studio to explore Generative AI capabilities in application development.
- Practiced UI/UX design, application prototyping, feature development, debugging, and iterative enhancements.
- Gained project-based experience with Firebase integration, application testing, and standard Android development practices.

Projects

AI Smart Mirror **Oct 2022 – Apr 2023**
Technologies: Python, Raspberry Pi 3B+, OpenCV, React, Node.js

- Built a multimodal embedded interface combining facial recognition, voice commands, and gesture-based controls on a Raspberry Pi 3B+.
- Achieved 92% facial recognition accuracy and integrated live weather and news feeds into a personalized dashboard.
- Implemented a dashboard with sub-second response latency and an ambient-light-adaptive display algorithm that reduced power consumption by 35%.

Price Vision AI **June 2025 – Dec 2026**
Technologies: Python, JavaScript, React.js, Web Scraping, API Integration

- Developed an AI-powered product discovery system combining image-based and text-based search to identify and retrieve relevant products.
- Built a price comparison workflow to collect, organize, and compare product information across e-commerce platforms.
- Designed a user-friendly web interface displaying product images, specifications, prices, and direct purchase links to help users make informed purchasing decisions.

Publications

- **AI Smart Mirror:** Research paper on an intelligent smart mirror integrating facial recognition, voice commands, gesture-based interaction, and real-time information display.
- **Price Vision AI:** Research paper on an AI-powered product discovery and price comparison system using image-based and text-based product search.

Education

Sai Vidya Institute of Technology **2023 - 2026**
Bachelor of Engineering (B.E.) – Computer Science and Engineering – *CGPA: 8.0/10*

Government Polytechnic (GPT) **2020 - 2023**
Diploma – Computer Science – *CGPA: 7.9/10*
